Battery Recycling!

Starting May 1st, household batteries will now be accepted for recycling at the curb for no additional charge in Unincorporated Washington County (Urban and Rural areas, residential customers only). We started a battery recycling program in November in other limited jurisdictions and are happy to now be able to offer this program to Unincorporated Washington County residents! At this time, the cities of Hillsboro and Beaverton are not yet included in this program, but we are discussing the possibility with them.

If your home is located in the following jurisdictions, you can recycle batteries curbside: Tigard, Sherwood, King City, Durham, or Unincorporated Washington County.

Place your batteries in a 1-quart zip-sealed plastic bag and place the bag in your red bin. Wait until you have a full bag before putting your batteries out for collection. If your bin is full of glass, place the bag on top. If you do not have glass to set out, still place your red bin out and put the bag of batteries inside the bin. Batteries are collected on the same schedule as your glass recycling.

Batteries Accepted:

Household batteries including alkaline, 6 to 9-volt, rechargeable alkaline, NiCad, lithium, silver oxide, and button cell batteries. All batteries, except standard alkaline, must have terminal ends taped. Limit of a single 1-quart bag per pick up.

Recycle+ Services!

We are excited to announce we are offering a new recycling program for our residential customers in Urban Unincorporated Washington County! This new recycling program, called Recycle+, will begin on July 1st.

In addition to your standard curbside recycling service, we are offering a new optional recycling service for hard to recycle materials including:

- Film plastics—*this material will be going to Trex, where it will be made into high performance composite decking.*
- #1 PET clamshell plastics—*this material will be going to Green Impact Plastics, where the clamshells are turned into berry baskets.*
- Textiles—*This material will be going to Pioneer Wiping Cloth, where it will be downcycled into wiping cloths and rags.*
- Compact fluorescent light bulbs—*This material will be going to URT, where the bulbs are safely processed into their separate components such as mercury, aluminum, and glass for recycling.*

Pride will provide you a purple bin with a lid, so these materials can be kept dry. We will also provide you with clear plastic bags to sort the material within the purple bin. This will be an on call service, you will be able to schedule a pick-up when you have a full bin of materials ready to be collected. The service day will coincide with your glass recycling collection schedule.

If you're interested in learning more about the program, visit our website! There is a sign up form online so you can register for this service in advance and be ready to go once collection starts in July. There is an additional charge for this service.

<https://pridedisposal.com/residents/recycle-plus>

We are actively working with our other jurisdictions to establish similar programs in all of our service areas but it is only available to Urban Unincorporated Washington County residential customers at this time. If you live in another Pride Disposal service area, stay tuned!
